Enhance your pedicure to indulges your body because you only have one!

Benefits:

Infection detection:

A nail artist might be able to detect fungal infections or bunions early, so you can deal with them before they become an issue.

Softer skin:

Many pedicures will use creams, lotions, and other add-ons that work to cure dry skin. And nearly all of them include exfoliation to remove any dead, unnecessary skin.

Cell phone will be taken away at the start of this service & returned at end.
